

A beautiful, harmonious and peaceful residential community embedded in a sea of flowers.

The Jardins de Santa Fé condominium community is a respectfully developed, safe residential community where resident families and guests show respect and love for each other and for a natural environment dominated by flowering trees and plants. The community is characterized by low visual and environmental impact home, landscape and property boundary designs. Every element of the community will preserve the vistas both from each building site and from surrounding areas to the maximum extent practicable.
